Molly Teske is a patent agent with Foley & Lardner LLP. Molly is a member of the Mechanical & Electromechanical Technologies Practice Group. Molly focuses her practice on assisting clients with building robust utility and design patent portfolios, including in both domestic and international jurisdictions. Molly leverages her technical background to assist clients across a broad variety of technology areas. For example, Molly assists clients with protecting innovations in the following fields:

- Vehicle systems
- Smart buildings
- Construction equipment
- Medical devices
- Software applications
- Outdoor sporting goods
- Fitness equipment
- Manufacturing equipment

Before joining Foley, Molly worked as an engineer creating residential and commercial building energy models. She also worked as an engineer in both food and beverage manufacturing and pulp and paper industry servicing.
