Antoinette F. Konski is a partner and intellectual property lawyer with Foley & Lardner LLP, and serves as managing partner of the Silicon Valley office. She also served as a co-chair of the firm's national Life Sciences Industry Team and is the former vice-chair of the firm's national Chemical, Biotechnology & Pharmaceutical Practice Group.

Representative Experience

Antoinette's practice focuses on advising clients about the creation, protection, acquisition, and maximization of intellectual property assets in a manner that optimally aligns with their business objectives. She primarily counsels biotechnology, pharmaceutical, and medical device companies on all aspects of obtaining, defending, evaluating, licensing, and enforcing intellectual property rights and patents. Antoinette counsels clients on how to best utilize their intellectual property assets as a powerful tool in effectuating their business strategy, whether that involves gaining a competitive market advantage, establishing or consolidating their market position, or obtaining the maximum value for or commercializing their intellectual property assets.

She manages complex global patent portfolios (having drafted over 600 original patent applications) in diverse technologies, including personalized CAR and NK cell therapy, gene therapy, antibody therapeutics, pharmaceuticals, diagnostics, formulation technology, and medical devices. Antoinette also has specialized expertise in precision/personalized medicine. She has extensive experience in freedom-to-operate and landscape analysis of antibody technologies and cell and gene therapies, which allows her to assist clients in developing innovative, novel, and competitive technologies in these fields.

Antoinette also has significant experience in assisting clients prepare for the diligence of intellectual property assets within the context of various business transactions, including public or private investments, strategic acquisitions, and public offerings.

Antoinette has also successfully represented clients in multiple inventorship disputes, derivation and reexamination proceedings before the United States Patent Office, as well as successfully argued several cases before the United States Patent Trial and Appeal Board.
